Sue, Jordan,

I have not gotten very far with this. At the risk of being terse and sounding critical, I have a few general comments:

**Deliberative Process / Ex. 5**

Perhaps Jordan has another draft in the works. If so, I'll wait to see that before finishing the one I have in hand. Sorry if I'm holding things up,  
Karen

Subject: Re: RDX neuro/mortality comments -- mortality comments

Jordan,

I know I promised some time back that I'd read the rest of this piece. I finally got to the mortality section. My comments are on the attached file. I'm happy to discuss them -- stop by any time. Also, Karen will be taking more of the lead on the drafts of the RDX health effect sections, as soon as she emerges from BaP. We haven't compared notes, so it might be worth talking to both of us with questions so we don't provide conflicting direction.

thanks,

Sue

Subject: RDX neuro/mortality comments

Jordan and all,

I'm sending my comments to date on the neuro/mortality section for RDX. My computer has slowed to a crawl (or slower) so it's become almost impossible to type. I haven't finished my comments on the mortality section, but will get to that soon.

**Deliberative Process / Ex. 5**

I'm around mostly on Wed for questions.

Sue
